1. Purpose

This guide provides standard troubleshooting procedures for frequently reported issues across TechNova Solutions. It helps employees resolve problems efficiently while ensuring consistency and compliance with company policies.

2. Scope

Applicable to:

- All Employees
 - IT Support
 - Engineering Teams
 - AI Department
 - Product Teams
 - Customer Support
 - Managers
-

3. HR Issues

Problem: Unable to apply for leave

Possible Causes

- Leave balance exhausted
- Manager approval pending
- HR Portal unavailable

Resolution

1. Verify leave balance.
 2. Check request status.
 3. Contact HR if the issue persists.
-

Problem: Salary not credited

Possible Causes

- Incorrect bank details
- Payroll processing delay

Resolution

1. Verify bank details in the HR Portal.
 2. Contact Payroll Support.
 3. Raise an HR service request.
-

4. IT Issues

Problem: Laptop does not boot

Possible Causes

- Battery failure
- Operating system issue
- Hardware fault

Resolution

1. Connect the charger.
 2. Perform a restart.
 3. Raise a Critical IT ticket if the issue continues.
-

Problem: VPN connection failed

Possible Causes

- Internet connectivity issue
- Expired credentials
- MFA failure

Resolution

1. Verify internet connectivity.
 2. Re-authenticate using MFA.
 3. Restart the VPN client.
 4. Contact IT Support if unresolved.
-

Problem: Unable to print documents

Possible Causes

- Printer offline
- Driver issue
- Network connectivity

Resolution

1. Confirm printer status.
 2. Restart the printer.
 3. Reinstall printer drivers.
 4. Contact IT if needed.
-

5. Information Security Issues

Problem: Suspicious email received

Resolution

1. Do not open attachments.
 2. Do not click links.
 3. Report the email using the phishing reporting option.
 4. Delete the email after reporting.
-

Problem: Lost company laptop

Resolution

1. Notify IT immediately.
 2. Inform the Information Security Team.
 3. Change passwords.
 4. Request a replacement device.
-

6. Engineering Issues

Problem: Git merge conflict

Resolution

1. Pull the latest changes.
 2. Resolve conflicts locally.
 3. Run tests.
 4. Submit the updated Pull Request.
-

Problem: Build failure

Possible Causes

- Dependency conflicts
- Compilation errors
- Failed unit tests

Resolution

1. Review build logs.
 2. Fix reported errors.
 3. Re-run the build pipeline.
 4. Request peer review if necessary.
-

Problem: Deployment failure

Resolution

1. Review CI/CD logs.
 2. Verify environment configuration.
 3. Roll back if production is affected.
 4. Inform the Release Manager.
-

7. AI Department Issues

Problem: Low model accuracy

Possible Causes

- Poor-quality data
- Data drift
- Incorrect feature engineering

Resolution

1. Analyze evaluation metrics.

2. Review training data quality.
 3. Retrain the model.
 4. Validate results before deployment.
-

Problem: RAG returns irrelevant answers

Possible Causes

- Poor chunk size
- Low-quality embeddings
- Incorrect retrieval configuration

Resolution

1. Review chunk size and overlap.
 2. Rebuild the vector database.
 3. Evaluate embedding model quality.
 4. Adjust retriever parameters and test again.
-

Problem: High LLM response latency

Possible Causes

- Large prompt size
- Slow model inference
- High server load

Resolution

1. Reduce unnecessary context.
 2. Optimize prompt design.
 3. Monitor infrastructure utilization.
 4. Scale compute resources if required.
-

8. Product Issues

Problem: User cannot log in

Resolution

1. Verify credentials.
2. Confirm MFA enrollment.

3. Unlock the account if necessary.
 4. Reset the password.
-

Problem: API request returns HTTP 500

Possible Causes

- Application error
- Database unavailable
- Configuration issue

Resolution

1. Check application logs.
 2. Verify database connectivity.
 3. Restart affected services.
 4. Escalate to Engineering if unresolved.
-

Problem: Dashboard loads slowly

Resolution

1. Check server utilization.
 2. Review database query performance.
 3. Optimize caching.
 4. Monitor application metrics.
-

9. Customer Support Issues

Problem: Ticket exceeds SLA

Resolution

1. Inform the customer.
 2. Escalate to the next support level.
 3. Update the ticket regularly until resolution.
-

Problem: Customer requests ticket reopening

Resolution

1. Verify the original issue.
 2. Reopen the ticket.
 3. Continue investigation.
 4. Confirm resolution with the customer.
-

10. Escalation Guidelines

Escalate issues when:

- Production services are unavailable.
- Security incidents are detected.
- SLA targets are at risk.
- Business operations are affected.
- Root cause cannot be identified.

Escalation Path:

Level 1 → Level 2 → Engineering Team → Department Manager → Executive Leadership

11. Troubleshooting Checklist

Before escalating, verify:

- ✓ Issue reproduced successfully
 - ✓ Error messages captured
 - ✓ Logs reviewed
 - ✓ Recent changes identified
 - ✓ User permissions verified
 - ✓ Documentation consulted
 - ✓ Initial troubleshooting completed
-

Troubleshooting Summary

Category	Common Issues
HR	Leave, Payroll

IT	Laptop, VPN, Printer
Security	Phishing, Lost Devices
Engineering	Git, Build, Deployment
AI	Model Accuracy, RAG, Latency
Product	Login, API, Dashboard
Support	SLA, Ticket Reopen
